

ONE WAY / TWO WAY CIRCULATION COMPARISONS

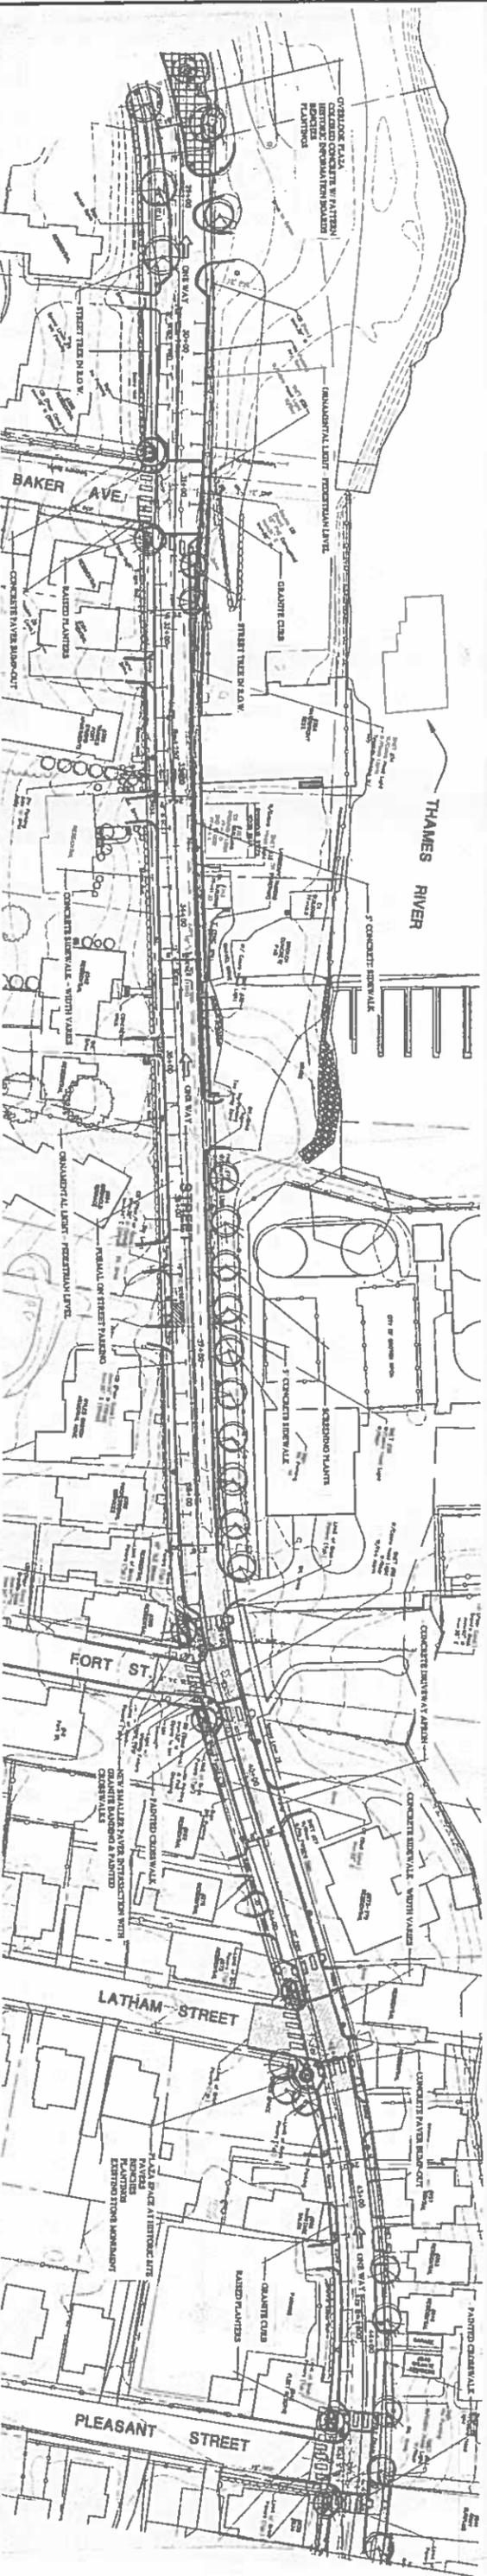

ONE WAY

- One way streets allow for more on-street parking.
- Changes traffic patterns on adjacent streets.
- Wider spaces for sidewalks, street amenities, and/or on-street parking.
- More opportunities to make the street attractive to pedestrians.

TWO WAY

- Higher traffic volumes.
- Decrease “Vehicle Miles Traveled” by eliminating indirect routes (driving around the block to get to your destination).
- Increased access to businesses.
- More visibility to businesses and adjacent properties.
